WORK EXPERIENCE

Junior Software Engineer - Battery Low Interactive Ltd. (Internship)
Aug 2025 – Jan 2026(On-site, Dhaka, Bangladesh)
- Developed responsive website interfaces using HTML, CSS, JavaScript, and Bootstrap 4.4.1.
- Worked with React.js, React Bootstrap, Axios and React Router to build and connect frontend features.

Project Auditor - Dhaka North City Corporation (Contract)
Apr 2023 – Aug 2023(Hybrid, Dhaka, Bangladesh)
- Reviewed project and helped prepare project progress and compliance reports.
- Collaborated with engineering and administrative teams to verify project milestones.

Client Management - BRAC (Seasonal)
Jan 2022 – May 2022 (Hybrid)
- Handled client relationships and service inquiries and supported a positive client experience.
- Coordinated with operational teams to support client satisfaction and retention.

PROJECTS

Project 1: HireMaster (Team Project) Live link | code link
Overview: HireMaster is a job-searching platform. As the team leader at HireMaster, I oversee the admin dashboard, payment system, and user-set profile form, facilitating efficient job applications and management between individual job seekers and hiring managers.
Key Feature:
- Dynamic User's Route (Admin, Job Seekers, Hiring Manager)
- Job Posting, Searching, Job News
- Chatbot & In-App Messaging

Technology Used: React.js, Tailwind, Redux-toolkit, Node.js, Express.js, MongoDB, Netlify, Vercel.

Project 2: Hero.IO - App Store Platform Live link | code link
Overview: A modern, responsive App Store platform that allows users to explore, search, install, and uninstall applications through an interactive interface. The platform provides detailed app information, download statistics, user ratings, and a personalized installation management system for a seamless user experience.
Key Feature:
- Browse applications with detailed information, download counts, ratings, and individual app details.
- Search applications by name and explore available apps through a responsive grid layout.
- Install and uninstall applications with a dedicated dashboard to manage installed apps.

Technology Used: React.js, JavaScript, Tailwind CSS, React Router, Local Storage, Vercel.

Project 3: Personal Portfolio – Full-Stack Developer Portfolio Live link | code link

Overview: A modern, responsive full-stack personal portfolio website built using Next.js, TypeScript, and Tailwind CSS to showcase projects, technical skills, and professional experience. The platform features a secure admin dashboard, dynamic project management, and a functional contact system integrated with a PostgreSQL database for a seamless user experience.
Key Feature:
- Showcase projects with detailed descriptions, technology stacks, screenshots, and live project links.
- Manage projects through a secure admin dashboard with options to add, edit, delete, publish, and unpublish projects.
- Allow visitors to send messages through a functional contact form, with an admin dashboard to view and manage received messages.

Technology Used: Next.js, React.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma ORM, NextAuth.js (Auth.js), Node.js, Neon Database, Vercel, Motion (Framer Motion), Lucide React.

EDUCATION

Computer Science and Engineering
Institute: Green University of Bangladesh (2021–2026)
